Jaffrey Meetinghouse Tower Project

Mid-Point Review

Submitted: June 18, 2022

Note: I can find no guidelines for this report, only for Baseline Documentation Report therefore I'm not sure what you are looking for so am merely writing up a progress report.

The Meetinghouse Tower Project is nearing completion which is scheduled for July 1, 2022. Some work in non-public areas may continue into July.

- New wood risers and treads installed in Tower Levels 1-5.

- Exterior painting completed except for the very top of the Spire and clock faces.

- Plaster repairs and skim coating of "yellow" room on Tower Level 2 completed.

- Interior painting ("yellow" room on Tower Level 2): To be done during the week of June 20th.

- Electrical work including new lighting on Tower Level 2 and above completed.

- Fabrication of steel handrails nearing completion. To be installed during week of June 20th.

- All hands, hours & minutes removed from the four clock faces and being re-gilded by D'Avanza Clock Repair of Goffstown. Awaiting estimate for fabrication of new hands. These may not be ready for re-installation until after July 1st.

- Deteriorated wood was found at Bell Levels 2 through 4 and is being repaired prior to painting. Several decorative urns have deteriorated to the point where replication became necessary and they have been installed. Some deteriorated portions of the green panels on Bell Level 2 have been repaired.

- No difficulties have been encountered in this project other than the somewhat expected wood deterioration at the higher levels of the Tower.
