

Holiday Greetings 2021

The Snowroller on Dublin Road. The Shattuck Inn on the left and The Annex ahead.

BEFORE the common use of tractors and trucks, Snowrollers were used to maintain the roads in winter. Rollers were comprised of two huge wooden drums. It was necessary to have two separate drums so that the contraption would have some flexibility and be able to adjust itself to the differing heights in the crown of the road. With one pass, they were able to clear the road wide enough for two teams to pass each other. Horses were used to pull Snowrollers as oxen were considered too slow. 🐾
